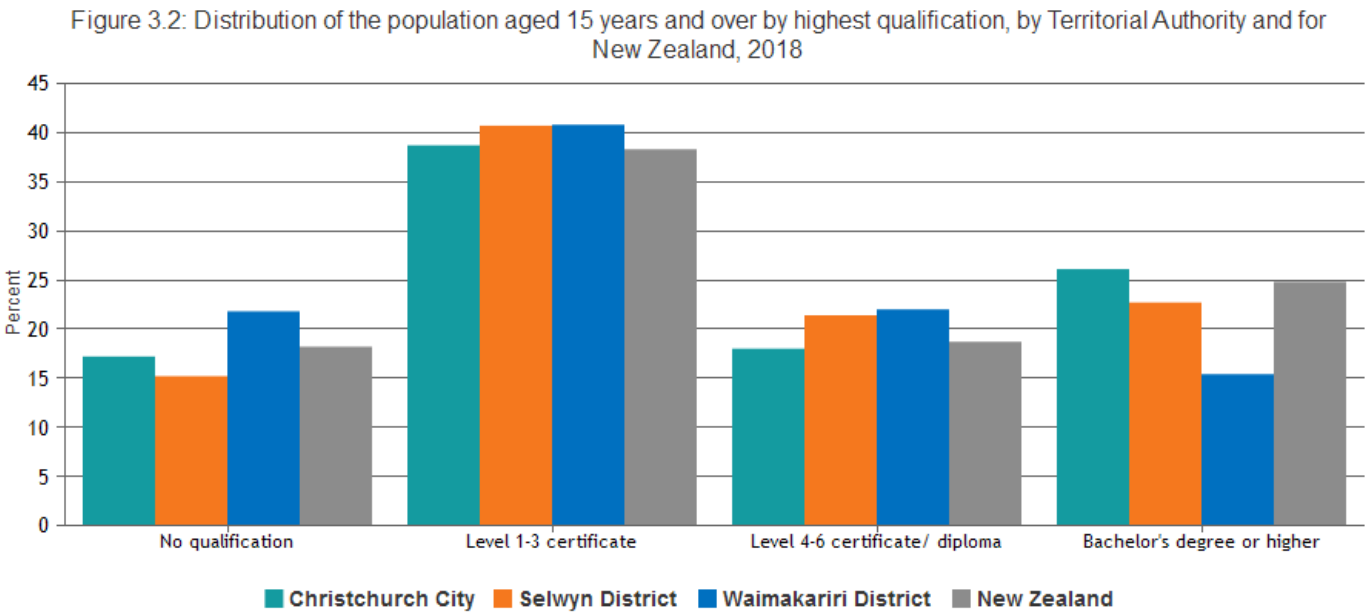
Highest qualification: Breakdown by Territorial Authority



When the distribution of highest qualifications gained is broken down by Territorial Authority (TA), similar levels of overall achievement are evident at the 1–6 certificate/diploma levels. However, some TA-level differences are evident for low versus higher educational attainment levels. For example, Waimakariri District has the highest proportion with no qualification, while Christchurch City has the highest percentage with a Bachelor's degree or higher qualification.

Data Sources for Highest qualification

Source: Statistics New Zealand.
Survey/data set: Census of Population and Dwellings. Access publicly available data from the Statistics New Zealand website http://nzdotstat.stats.govt.nz/wbos/Index.aspx?_ga=2.74024852.706492025.1596487479-962330583.1594854687
Source data frequency: Census conducted every 5 years.

Metadata for the Highest qualification indicator is available at https://www.canterburywellbeing.org.nz/index-data
