

Employment rate: Breakdown by age

Downloaded from https://www.canterburywellbeing.org.nz/our-wellbeing/employment/employment-rate/#link-breakdown-by-age on 25/04/2024 10:18 AM

The figure shows a general pattern of convergence between the age groups, for non-seasonally adjusted employment rates in greater Christchurch over the last ten years. The employment rate for younger people (15–24 years) appears to have been influenced by earthquake and rebuild-related activities; declining substantially following the start of the Canterbury earthquake sequence, before rebounding during the years 2012 to 2015 (72.4%, December 2014), then flattening from 2016 to the most recent result of 62.4 percent.

Data Sources for Employment rate

Source: Statistics New Zealand.

Survey/data set: Household Labour Force Survey to September 2022. Custom data request for greater Christchurch region. Source data frequency: Quarterly.

Metadata for the Employment rate indicator is available at https://www.canterburywellbeing.org.nz/index-data
