Employment rate: Breakdown by age

Downloaded from https://www.canterburywellbeing.org.nz/our-wellbeing/employment/employment-rate/#link-breakdown-by-age on 29/03/2024 10:53 AM

Figure 2.3: Employment rate (number employed for more than an hour a week as a proportion of the working-age population, non-seasonally adjusted), in greater Christchurch, by age group, 2008–2022

The figure shows a general pattern of convergence between the age groups, for non-seasonally adjusted employment rates in greater Christchurch over the last ten years. The employment rate for younger people (15–24 years) appears to have been influenced by earthquake and rebuild-related activities; declining substantially following the start of the Canterbury earthquake sequence, before rebounding during the years 2012 to 2015 (72.4%, December 2014), then flattening from 2016 to the most recent result of 62.4 percent.

Data Sources for Employment rate

Source: Statistics New Zealand.
Survey/data set: Household Labour Force Survey to September 2022. Custom data request for greater Christchurch region.
Source data frequency: Quarterly.
