

Access to transport: Breakdown by age

Downloaded from <https://www.canterburywellbeing.org.nz/our-wellbeing/environment/access-to-transport/#link-breakdown-by-age> on 30/05/2023 1:31 PM

The figure shows that the proportion of respondents who reported being satisfied or very satisfied with their ease of access to suitable transport decreased for all age groups from 2017 to 2018. The largest decrease was in the 18 to 24 years age group, for which the proportion decreased by 15 percentage points (80.2% in 2017 and 65.0% in 2018). Satisfaction with ease of access to suitable transport has increased since 2018 among all age groups, significantly so among those aged 50-64 years, and 65-74 years. In 2020, the level of satisfaction was statistically similar between age groups with the exception of the proportion for the 65 to 74 years age group being statistically significantly higher than for the 18 to 24 years age group (83.3% and 72.6% respectively).

Data Sources for Access to transport

Source: Te Whatu Ora Waitaha Canterbury - formerly the Canterbury District Health Board.

Survey/data set: Canterbury Wellbeing Survey to 2020. Access publicly available data from Te Mana Ora | Community and Public Health website www.cph.co.nz/your-health/wellbeing-survey/

Source data frequency: Annually.

Metadata for the Access to transport indicator is available at <https://www.canterburywellbeing.org.nz/index-data>
