

Gambling machines: Breakdown by Territorial Authority

Downloaded from <https://www.canterburywellbeing.org.nz/our-wellbeing/environment/gambling-machines/#link-breakdown-by-territorial-authority> on 21/04/2021 4:33 PM

The figure shows the gambling machine density per 10,000 population for Christchurch City, and the Selwyn and Waimakariri districts, from 2008 to 2019. The pattern is one of declining density overall, in keeping with the national picture. There is higher gambling machine density in Christchurch City, as the largest urban centre, and lower density in Selwyn District.

The pattern for gambling machine proceeds for Christchurch City and the Waimakariri and Selwyn districts (NZD per annum, per 10,000 population aged 15 years and over) is one of overall decline, which is broadly in line with gambling machine density across New Zealand overall (data not shown). For 2019, gambling machine proceeds are highest in Christchurch City (equivalent to \$241 per person aged 15 years and over) and lowest in Selwyn District (\$84 per person). Gambling machine proceeds for the Waimakariri District were approximately midway between Christchurch City and Selwyn District in 2019 (\$164 per person).

Data Sources for Gambling machines
