Household crowding: Breakdown by ethnicity

Downloaded from https://www.canterburywellbeing.org.nz/our-wellbeing/housing/household-crowding/#link-breakdown-by-ethnicity on 30/03/2024 2:12 AM

The figure shows that the distribution of exposure to household crowding in the Canterbury DHB region is uneven, with higher levels for Pacific peoples and Māori, relative to the total population. Proportions living in homes defined as crowded in 2013 and 2018 were 30.4 and 27.1 percent for Pacific peoples, 13.8 and 12.0 percent for Māori, and 6.2 and 7.0 percent for the total population, respectively.

Data Sources for Household crowding

Source: Statistics New Zealand.
Survey/data set: Census of Population and Dwellings. Custom request for Canterbury DHB region.
Source data frequency: Census conducted every 5 years.

Metadata for the Household crowding indicator is available at https://www.canterburywellbeing.org.nz/index-data
