

Household income: Breakdown by ethnicity

Downloaded from <https://www.canterburywellbeing.org.nz/our-wellbeing/income/household-income/#ink-breakdown-by-ethnicity> on 21/03/2025 3:05 AM

The figure shows a substantial income disparity between Māori and non-Māori ethnic groups in greater Christchurch for 2019–2021. Equivalised disposable weekly household income for Māori shows notable variability, due to smaller absolute numbers, but there is a picture of lower disposable weekly household income (compared with non-Māori). In 2021, the median equivalised disposable weekly household income in greater Christchurch for Māori was substantially below that of non-Māori (\$780 for Māori and \$880 for non-Māori; \$100 difference). This approximately 12 percent difference (Māori vs non-Māori) in greater Christchurch is consistent with that previously reported for New Zealand overall [6].

Data Sources for Household income

Source: Statistics New Zealand.

Survey/data set: New Zealand Household Economic Survey. Custom data request for greater Christchurch region.

Source data frequency: Annually.

Metadata for the Household income indicator is available at <https://www.canterburywellbeing.org.nz/index-data>
