CANTERBURY WELLBEING INDEX

Satisfaction with income: Breakdown by income

Downloaded from https://www.canterburywellbeing.org.nz/our-wellbeing/income/satisfaction-with-income/#link-breakdown-by-income on 28/03/2024 10:31 PM

The figure clearly shows the underlying relationship between respondents' satisfaction with household income and level of household income, across the four income bands. A substantial and statistically significantly higher proportion of respondents from households earning $100,000+ indicated that they were satisfied or very satisfied with their household income, compared with the lower income groups (76.4% for $100,000+ group in 2022, compared with 35.2% for <$30,000; 46.4% for $30,000–$60,000; and 53.8% for $60,001–$100,000 groups). Between 2017 and 2022, there was a statistically significant 13.8 percentage point decrease in satisfaction with household income for respondents in the <$30,000 income group (from 49.0% in 2017 to 35.2% in 2022).

Data Sources for Satisfaction with income
