

Sense of community: Breakdown by disability

Downloaded from <https://www.canterburywellbeing.org.nz/our-wellbeing/social-capital/sense-of-community/#link-breakdown-by-disability> on 27/04/2024 11:39 AM

The figure shows that the level of sense of community (proportion of respondents agreeing or strongly agreeing that they feel a sense of community with others in their neighbourhood) for older respondents with a long-term health condition or disability (aged 65 years and over) was not significantly different from the proportion for those without, at the majority of timepoints presented (46.1%, and 45.3% in 2022, respectively). However, the proportion for younger respondents (those aged under 65 years) with a long-term health condition or disability was statistically significantly lower than the other two groups at several timepoints but not statistically significantly different in 2022 (34.5%).

Data Sources for Sense of community

Source: Te Whatu Ora Waitaha Canterbury - formerly the Canterbury District Health Board.

Survey/data set: Canterbury Wellbeing Survey to 2022. Access publicly available data from Te Mana Ora | Community and Public Health website www.cph.co.nz/your-health/wellbeing-survey/

Source data frequency: Annually.

Metadata for the Sense of community indicator is available at <https://www.canterburywellbeing.org.nz/index-data>
