

Emotional wellbeing: Breakdown by disability

Downloaded from <https://www.canterburywellbeing.org.nz/our-wellbeing/subjective-wellbeing/emotional-wellbeing/#link-breakdown-by-disability> on 23/02/2020 2:13 AM

The figure shows that respondents with a disability or long-term health condition, had lower WHO-5 Wellbeing Index mean scores compared with respondents without a disability or long-term health condition, across the time-series from 2013 to 2019 (for 2019, mean WHO-5 score 12.8 and 15.9, respectively). While mean scores for both groups appear to show an overall upward trend, the difference between the two groups is both substantial and statistically significant throughout the time-series.

Data Sources for Emotional wellbeing

Source: Canterbury District Health Board.

Survey/data set: Canterbury Wellbeing Survey to 2019. Access publicly available data from the Community and Public Health (Canterbury DHB) website www.cph.co.nz/your-health/wellbeing-survey/

Source data frequency: Annually.

Metadata for the Emotional wellbeing indicator is available at <https://www.canterburywellbeing.org.nz/index-data>
